

A deeply cleaned floor that extends your floor's lifespan and saves you time

A clean floor says "welcome" to your customers. A floor deeply cleaned on a routine basis elevates your positive image and helps your flooring last longer. Cintas delivers our proven method of deep cleaning so that you'll know your floors are both properly cared for and projecting a sparkling clean image. Using a process that's Certified Platinum by The Carpet and Rug Institute (CRI), we remove between 90 and 100 percent of soil, along with water and moisture. This prevents microscopic fungal growth and ensures quick dry time along with texture retention. Our technology is powerful, but does not hurt your carpet pile.

CUSTOM FLOORING CARE, PROFESSIONALLY DELIVERED

Save money, and let Cintas extend the life of your carpet, tile, grout, carpet tile, vinyl composition tile (VCT) or even concrete.

Deep clean service is delivered by certified technicians who know how to balance the key elements of clean: temperature, time, agitation and chemicals. Your needs come first, so services are customized to fit your schedule and unique workplace, and provide the best, most consistent results without damaging your floors.

The Cintas arsenal of industry-leading equipment means your floors get professional service to help them look spick-and-span once more. We deliver an array of tools and technology to your business - including portable units, roto-scrubbers, wet vacs and our truck - to provide the best results.

FLOORING FACT: A recent case study revealed that regularly scheduled floor cleanings cut the cost of maintenance by 22 percent and doubles the life of a floor.¹

¹ Bodo, R., & Meents, M. (2014). "A Case Study and Description of the Comprehensive Floor Care Plan of Carpet Maintenance." The Journal of Cleaning, Restoration, & Inspection, Volume 1 (Issue 3), 10-15.

A recent case study revealed that regularly scheduled floor cleanings cut the cost of maintenance by 22 percent and doubles the life of a floor.
